SUBJECT INDEX

Auroral excitation of infrasonic waves

Auroral infrasonic waves and poleward expansions of auroral substorms at Inuvik, N.W.T., Canada, *C. R. Wilson* 179
Observations of acoustic aurora in the 1–16 Hz range, *R. W. Procunier* 183

Book Reviews

Interstellar Gas Dynamics 545
Seismicity of the European Area 546

Data processing of infrasonic signals

Digital computer programs for recording and processing infrasonic array data, *A. U. Kerr* 21
Erroneous phase velocities from frequency-wavenumber spectral sections, *E. Smart* .. 247
Co-phase analysis of atmospheric wave data, *H. A. Montes & E. S. Posmentier* .. 271
Fast frequency-wavenumber analysis and Fisher signal detection in real-time infrasonic array data processing, *E. Smart & E. A. Flinn* 279

Heat flow

Implications of heat flow and bottom water temperature in the eastern equatorial Pacific, *R. P. Von Herzen & R. N. Anderson* 427
On the thermal balance of mid-ocean ridge, *C. R. B. Lister* 515

Infrasonics and atmospheric acoustics—general

An ' ionospheric weather ' index, *T. M. Georges* 243
Bibliography on infrasonic waves, *J. E. Thomas, A. D. Pierce, E. A. Flinn & L. B. Craine* 399

Acoustic-gravity waves

Infrasound radiated during the Montana earthquake of 1959 August 18, *R. K. Cook* .. 191
Some notes on discrete trains of infrasonic waves produced by point sources, *R. Cabré, J. Rubín de Celis & J. Flores* 199
Correlation of winds and geographic features with production of certain infrasonic signals in the atmosphere, *R. J. Larson, L. B. Craine, J. E. Thomas & C. R. Wilson* 201
Observations of infrasound and subsonic disturbances related to severe weather, *H. S. Bowman & A. J. Bedard* 215
Analysis of the spatial coherence of short-period acoustic-gravity waves in the atmosphere, *H. Mack & E. A. Flinn* 255
Acoustic-gravity wave propagation in a measured atmosphere, *J. E. Thomas & L. B. Craine* 311

Atmospheric acoustics

Natural infrasound as an atmospheric probe, *W. L. Donn & D. Rind* 111
Characteristics of infrasonic signals from rockets, *N. K. Balachandran & W. L. Donn* .. 135
On the generation and propagation of shock waves from Apollo rockets at orbital altitudes, *D. E. Cotten, W. L. Donn & A. Oppenheim* 149

PAGE

Air-coupled seismic waves at long range from Apollo launchings, *W. L. Donn, I. Dalins, V. McCarty, M. Ewing & G. Kaschak* 161
Preliminary observations of 1–16 Hz natural background infrasound and signals from Apollo 14 and aircraft, *E. S. Posmentier* 173

Infrasonics—Instrumentation

On the measurement of infrasound, *R. K. Cook & A. J. Bedard* 5
A digital system for the acquisition and processing of geoacoustic data, *E. Herrin & J. A. McDonald* 13
Experimental noise reducers for an active microbarograph array, *F. H. Grover* .. 41
The acoustics of pipe arrays, *R. Burridge* 53
The structure of atmospheric turbulence and its application to the design of pipe arrays, *J. A. McDonald, E. J. Douze & E. Herrin* 99

Palaeomagnetism

Palaeomagnetic studies of Icelandic lava flows, *R. R. Doell* 459

Research Note

$dT/d\Delta$ measurements at Weston Observatory, U.S.A., *F. T. Wu & R. P. Allen* .. 537

Infrasonics—Seismological relations

A preliminary investigation into the relationship between long-period seismic noise and local fluctuations in the atmospheric pressure field, *G. G. Sorrells* .. 71
Earth motion caused by local atmospheric pressure changes, *G. G. Sorrells, J. A. McDonald, Z. A. Der & E. Herrin* 83
Distant seismic waves from a high-altitude source, *G. H. Nickel & W. A. Whitaker* .. 369

Seismology

P-wave residuals at some Iberic stations and deep structure of south-western Europe, *G. Payo* 481
Relative location of seismic events using surface waves, *D. von Seggern* 499

Sources of acoustic-gravity waves

Generation of long internal gravity waves in waveguides by rising buoyant air masses and other sources, *I. Tolstoy & J. Lau* 295
Second-order correction to the Reed–Otterman theory, *S. L. Kahalas & B. L. Murphy* 379
Acoustic-gravity wave generation at 120 km altitude by sea level detonation: A preliminary analysis of the Greene–Whitaker calculation, *S. L. Kahalas & B. L. Murphy* 391

Theory of acoustic-gravity waves

Extrapolation of time-dependent waveforms along their path of propagation, *J. F. Claerbout & Ansel G. Johnson* 285
Acoustic-gravity wave calculations in a layer with a linear temperature variation, *R. J. Greenfield & D. G. Harkrider* 323
Theory of the excitation and propagation of Lamb's atmospheric edge mode from nuclear explosions, *A. D. Pierce & J. W. Posey* 341
